Detailed Description

Detailed Description

... the display of data in a window with the look and feel of the navigation.

e ) Is reusability of prototype deliverables a requirement?  
fi What is the objective of the prototype?  
Depending...at the moment is limited, it is likely that in future versions Java or C++ **classes** will be able to  
140  
interface directly.

Implementation Considerations

a) Do the design ideas need...of testing techniques. In many cases, designers find that the best starting point is to **build** and test low-fidelity prototypes. These are paper-and-pencil 30 versions of user interfaces that...

...the behavior of systems very early in development. Before any code has been written, developers **build** prototypes on paper and test them with real users, simulating the human-computer interaction. Designs...that is not represented in the development tool repository cannot be loaded into the repository.

#### **Restructuring**

**Restructuring** tools are not analysis tools like the previous categories of reverse engineering tools, but design...

Detailed Description

Detailed Description

... in this section of the description of the invention.

AAA Authentication, Authorization, Addressing  
ADSL Asymmetric **Digital** Subscriber Line  
AIN Advanced Intelligent Networks  
AMA Automatic Message Accounting  
ATM Asynchronous Transfer Mode  
BIM...

...using the server. While this type of data exchange will continue, much  
more of the **information** flow in tomorrow's networks will be  
peer-to-peer. Since the ultimate goal is...

...example, the desktop computers.

The bulk of information transported in the future will be of **digital**

origin. This **digital** information will require a great deal ...it will be possible to support what was once a distinct set of services (voice, **video**, wireless) on separate parallel networks, on one integrated packet based network. There will still be...

...and call treatment (network messages and call termination). Examples of applications and features are the **CLASS** family of services (Call waiting, Call forwarding, Conference calling, Call rejection), enhanced call routing, Number Portability, Calling Card Services, and **Audio** delivered **Information** Services (e.g. travel, stocks and weather).

These IN capabilities are enabled by devices such...services, numerous automations in electronic internet commerce activities e.g. banking, shopping, 5 customer care, **education**, etc. As the NGN matures third party value added service providers will develop IP based...computer communications, many companies are becoming interested in advertising and supporting their products using an **online** computer service that can be accessed by customers. However, creating a large online computer service ...is preferably created in a manner that predicts buying tendencies. The virtual shopping environment is **tailored** automatically based on the user profile.

A plurality of items (i.e., products or services...

Abstract: The long term goal of our research is to develop a tool for recognizing human emotions during **e - learning** processes. This could be accomplished by **combining** quantitative indexes extracted from non-invasive **recordings** of four physiological signals: namely skin conductance, blood volume pulse, electrocardiogram and electroencephalogram. Wearable, non-invasive sensors, communicating with a PC, were applied to 30 students and data were **collected** during exposure to three different computer-mediated **content** stimuli designed to evoke specific emotional states: stress, relaxation and engagement. In this paper we describe both the general emotion evaluation algorithm, and present a preliminary results suggesting that some of the quantitative indexes may be successful in characterizing and distinguishing between the three different emotional states. Abstract: Use of **electronic teaching** materials (**e-material**) to support teaching is a trend. e-Material design is therefore an important issue. Currently, most e-material providers offer a package of solutions for different purposes. However, not all teachers and learners need everything from a single package. A preferable alternative is to find useful **material** from different packages and **combine** them for a particular **course**. Currently, most educators **collect** the **material** manually, which is time-consuming and may result in missed material. In this paper, we describe a system - the Teaching-Material Design Center, which follows the standard of Sharable Content Object Reference Model - to separate e-material for use as teaching templates and learning objects and to label the material with use of semantic **metadata** for searching. This system can find existing teaching templates and **learning** objects for **e-material** designers and provide a convenient environment for constructing customized e-material for different requirements. We describe the implementation and evaluation of the proposed system for a **course**. Our system is efficient in finding teaching templates and learning objects and shortening the e-material development process. [All rights reserved Elsevier]. (16 Refs)

**Abstract:** In this study, independent classifications of Landsat Thematic Mapper **imagery** and Jet Propulsion Laboratory AirSAR were **combined** to create an integrated classification of pasture and other vegetation types for a study area in the agricultural zone of Western Australia. The resulting classification **combines** greenness and brightness **information** from optical data with structure and water content information from synthetic aperture radar (SAR). Field observations of vegetation type, botanical composition, ground cover percentage, wet and dry biomass, canopy height, and soil water **content** were **collected** at 34 sites representing a range of pastures, browse shrubs, and crops. An unsupervised version of the Complex Wishart classification procedure, based on preserving scattering characteristics from the Freeman and Durden backscatter decomposition, was applied to the C-, L-, and P-band polarimetric SAR data. The optical classification was carried out using a principle component analysis on the green, red, and near-infrared bands and clustering on the basis of a **class** centroid **distance** measure and knowledge of ground targets. These two classification results were then fused together. Assessment of a confusion matrix using the individual sites showed that identification of more uniform, dense, and structurally distinct canopies was better than that of more diverse, sparse, and structurally ambiguous canopies, as the former were better represented by the canopy height attribute used in the SAR classification component. The optical classification enabled correction of SAR misclassification of vegetation due to surface roughness and soil moisture effects, or similar backscatter responses from herbaceous or arboreal canopies. The results show that simplification of vegetation into groups based upon properties with sensitive responses in both the optical and SAR domains, and combination of separate SAR and optical classifications, has potential for improving classification of diverse and heterogeneous herbaceous and browse cover in grazing lands. However, collection of ground calibration data must be at an appropriate spatial scale and include canopy and surface measurements directly related to backscatter mechanisms and spectral sensitivity. Abstract: This research investigates the suitability of a Web based pedagogic tool, for delivering network security **courses** in an educational framework. Our research is based on the Cisco network academy program, a comprehensive Web-based interactive **curriculum**, for computer networking. We consider the **curriculum** usage, and views expressed by lecturers and students, to assess whether this method could be usefully incorporated to include specific sections of **information** security subject domain.

**Curriculum** usage data was **collected**, by analysing log files of the Web server, which hosts the pedagogic documents. An on-line survey was administered, within the network academy community, in Europe Middle East and Africa. Results are extrapolated, to assess the suitability of the proposed deployment of network security **curriculum**. The deviation from current **e - learning** paradigms is addressed, in relation to the use of new technology such as Internet protocol TV (IPTV) multicasting for **distance learning**, targeted at **combining** the social context of learning to **content** delivery. **Abstract:** The development of skills among individuals in a society is essential for the creation of a new business. Information systems utilising information technology (IT) foster the sharing of new information and knowledge, transcending the limitations of time and space, and offer possibilities in generating new knowledge innovations. In this paper, we describe our development of an industry/academia collaborative agent system aimed at developing individual skills and creating new business innovations for promoting the launch of new enterprises, and the empirical trials we conducted using synchronicity and asynchronicity in the **combined** use of a **videoconferencing** system and the Internet aimed at mutual and self study and **information collection** activities concerning the provision of management **information content** and starting an enterprise. Through these trials, along with clarifying the validity of synchronous **distance learning** in promoting collaborative learning for busy working people, we clarified the importance to asynchronous **distance learning** of a framework for the active exchange of information from human resources and the latest learning information utilising mailing lists and other means. Abstract: Self- **learning** using the **Internet** can acquire not only concepts pertaining to the purpose of investigation, but also knowledge that is related to them, discovered in the process of investigation. As a result, we can learn a wide range of related knowledge free will. However in existing VOD ( **Video** On Demand) systems, there is no function available to effectively **combine** and provide texts, pictures and **videos**, nor can the related knowledge be acquired. Therefore, in this paper in order to make it easy to learn both the **video** contents and the knowledge related to them, we developed a system to **extract** related **information**, such as keywords suitable for the **video** contents and their related words, and we built an interface to efficiently view those related information and **videos**. Moreover in consideration of the distributed VOD server we clearly describe the relations between **video** keywords, their related words through XML/RDF in a standardized, interoperable manner for sharing and **combining** of **information**. Abstract: **Distance learning combines** computer, network and **multimedia** technologies to provide interactive learning environments transcending the limit of time and space. Using **video**-conferencing systems, teachers and students can proceed with face-to-face learning activities from different places in real time, and the design of **course materials** can also be diversified. Students may **obtain class** notes from **Web** sites and discuss with classmates on BBS. They can also ask questions and submit homework by sending e-mails to their teachers. The objective of the paper is to study the technologies related to synchronous **distance learning**, the construction of **distance - learning** classroom, **teaching** policies and learning attitudes, and cooperation between

broadcasting and receiving schools. Experimental results are provided to show the reaction from students who have taken such **courses**. (11 Refs)

Abstract: The Journal of Earth System Science Education (JESSE) aims to establish through electronic peer review and publication an orderly **collection** of resource **materials** for the broadly defined geoscience and related disciplines involved in Earth system and global change education. JESSE seeks submissions which provide substantive scientific content that challenges and intellectually stimulates educators and students through inquiry across a broad range of settings: the classroom, the laboratory, self study, group endeavors, **distance learning**, etc. JESSE will focus on the review and publication of **electronic learning** resources where scientific **content combined** with visualization enriches learning, and **metadata** and interoperability ensure ease of access and utilization. The Journal aims to stimulate the creativity of educators in the development of quality electronic resources which describe both the state and underlying processes which govern the Earth system, including human interactions, and to provide national recognition to authors through the peer review publication process. Ultimately, the peer reviewed collection will provide a holistic perspective of Earth system and global change science for a broad range of educational levels and settings with ready accessibility by

educators and learners throughout the nation and the world. JESSE will initially emphasize the publication of resources to be used at the university level, but will extend to lower grade levels and also to informal education as submissions and user need demands. (9 Refs)

**Constructivist online learning environment for social work education:  
An evaluation of students' learning process and outcome**

Author: Wong, Yu Cheung

Degree: Ph.D.

Year: 2003

Corporate Source/Institution: University of Hong Kong (People's Republic of China) (0842)

Source: VOLUME 65/04-A OF DISSERTATION ABSTRACTS INTERNATIONAL.  
PAGE 1243.

Descriptors: EDUCATION, **CURRICULUM** AND INSTRUCTION; EDUCATION, TECHNOLOGY; EDUCATION, HIGHER

Descriptor Codes: 0727; 0710; 0745

This study attempts to understand how students construct their knowledge in a new learning environment guided by constructivist learning principles as well as to find out whether such environment can produce a deeper learning outcome than one that is based on existing mode of classroom teaching.

A constructivist learning environment includes such crucial elements as intentional learning, active, authentic and cooperative learning. This involves using **information** technology to **build** up learning community as well as encourage learners to **obtain information** for knowledge construction.

A quasi-experimental design was employed. The experimental group comprised of 16 students taking a Social Policy Issues **course** via an **online learning** environment while the comparison group comprised of 18 students attending the same **course** in the existing classroom teaching. All students came from the same class studying in the final year of the BSW program of the University of Hong Kong. Background information indicated that the two groups of students were largely, homogeneous.

The outcome indicates that students had a positive evaluation of the **online learning** environment. However, the learning outcome analyzed by the SOLO Taxonomy does not show any significant difference. The students with better performance are more active in logging on the **online course** and post more messages on the bulletin board.

Patterns of students' participation in the bulletin board discussion

were analyzed. Students were enthusiastic in the beginning and the more active students tended to remain so throughout the **course**. Quality of postings improved with time on each discussion topic. Quite a few students reported that they preferred reading others' postings than giving their opinions. Teachers' roles were investigated. Giving encouragement, asking short and thought provoking questions and summarizing students' discussion were considered important for students' learning.

The study suggests that attention has to be given in areas related to students' learning habits and their preference on face-to-face interaction. Personal support for students should be emphasized in the early stage in dealing with the technological problems and building up a learning community among them. The participation of outside experts and students in the bulletin board is useful in promoting the "community spirit".

The new generation of social work students and social workers has to be social informaticists. The ability to learn in the new learning environment provides a promise for students and practitioners to face the challenges and opportunities open to the profession in the new millennium.

**TELEVISED POSTSECONDARY DISTANCE EDUCATION : FACTORS INFLUENCING POLICY CREATION AND THE EFFECT OF NEW TECHNOLOGIES AND MULTI-STATE EDUCATIONAL CONSORTIA ON STATE POLICY**

Author: STEWARD, DONALD LEE

Degree: ED.D.

Year: 1995

Corporate Source/Institution: THE GEORGE WASHINGTON UNIVERSITY (0075)

Director: REYNOLDS FERRANTE

Source: VOLUME 56/10-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 3854. 238 PAGES

Descriptors: EDUCATION, HIGHER ; EDUCATION, ADMINISTRATION ; EDUCATION, TECHNOLOGY

This national study **consolidates** descriptive **information** on televised postsecondary **distance education** policies current on June 1994 from the 50 states, District of Columbia, and Puerto Rico. The study's purpose is to assist higher education planners responsible for administering academic programs or allocating financial and personnel resources.

Demographic **information** and inferential statistics were **collected** from State Higher Education Executive Officer's (SHEEOs) and Wyoming. The adjusted response rate was 71% (35 states). The study found the majority of states (60%) had a policy including televised postsecondary **distance education**, almost two-thirds (65.7%) had policies governing telecommunications to offer degree programs, and almost half (48.6%) had regulations governing televised **distance education** crossing into the state. Eighty percent of states did not have an approved **distance education** plan that included televised postsecondary **distance education**. Seventy-one percent of responding states do not have a state-wide telecommunications plan. One-fourth of the states reported an approved plan constitutes state policy. When asked to rank 5 broad categories as important reasons to regulate, almost half (47.1%) chose quality first followed by coordinate efficient use of resources, and ensure consumer protection. For states with policies, funding of **distance education** was

important but not necessary. Multi-state educational consortia have had a neutral effect on policy formation in reporting states. New **video** telecommunications technologies have had a slightly important role in policy formation, especially in the area of technology effectiveness. States reported a very high agreement  $(\bar{x} = 4.65)$  that state level policies are important in fostering televised postsecondary **distance education**. For states that report a direct regulation approach, 90.9% have policies compared to 50% in market-competitive states, and 46.7% of Laissez-Faire states. Major policy issues have an impact on states with and without policies equally, except in the area of importance of state policies in fostering televised postsecondary **distance education**.

**SITE PRINCIPALS' LEADERSHIP STRATEGIES FOR CHANGING HIGH SCHOOL STAFF CULTURES TO SUPPORT SUCCESSFUL RESTRUCTURING OF CURRICULUM AND INSTRUCTION**

Author: AKIN, JEANNE ELLEN

Degree: ED.D.

Year: 1994

Corporate Source/Institution: UNIVERSITY OF THE PACIFIC (0173)

Chair: DENNIS BRENNAN

Source: VOLUME 55/11-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 3358. 162 PAGES

Descriptors: EDUCATION, ADMINISTRATION; EDUCATION, **CURRICULUM** AND INSTRUCTION; EDUCATION, SECONDARY

Descriptor Codes: 0514; 0727; 0533

While the process of changing educational systems is yet unclear, the relationship between teacher and learner places teachers at the focal point of change. The social/psychological organization of their workplaces known as staff culture is among the many issues effecting lasting reform. This study investigated the manner in which principals worked with this key variable in bringing about meaningful change.

Students are not learning at the levels required to be productive citizens in the 21st century. In order to reverse this situation, most teachers need to change their manner of teaching.

Despite years of reform efforts, many continue to resist change, particularly at the secondary level. This resistance is rooted in their professional norms, i. e., their **education** philosophy and beliefs. Most teacher have not been convinced of the need for change of their **curriculum** and instruction. Even though educational researchers find positive site culture to be key to reform of instruction, few school administrators have the understanding of site culture or training in interpersonal relation that is necessary to shape a culture which will accept and maintain change.

A qualitative investigation was made of case studies of restructured high schools and interviews with principals who had brought about restructuring at their sites. Teachers were also surveyed. Data was **gathered** through **content** analysis of the studies, interviews and survey questionnaires in the areas of teacher attitudes, status of **curriculum** before and after the projects, and action of principals throughout the process of change.

It was found that successful principals take action in common which fall into eight mutually exclusive categories. They also bring about change in a step by step priority process: (1) establish a clean campus and strong student discipline/attendance policies and develop University and business

partnerships, (2) facilitate professional development opportunities for teachers through research based programs and provide them with human and material resources; focus on improving staff morale, (3) provide opportunities for collaboration, innovation and shared decision-making, (4) work to improve instruction.

The information developed through this study can be used to guide and encourage school administrators in creating effective change in their schools.

913811 ORDER NO: AAD86-09658

**DETERMINING HUMAN GENETICS COURSE CONTENT NEEDED BY GENERAL STUDIES STUDENTS IN HIGHER EDUCATION AND BY THE LAY POPULATION**

Author: HINES, DICK MELVIN

Degree: ED.D.

Year: 1986

Corporate Source/Institution: BALL STATE UNIVERSITY (0013)

Source: VOLUME 47/02-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 488. 131 PAGES

Descriptors: EDUCATION, SCIENCES

Descriptor Codes: 0714

The problem investigated was whether the human genetics content taught in higher education institutions throughout the United States correlates with the needs of the lay population, general studies students, and with the content offered in the human genetics **courses** at Ball State University. Questionnaires were sent nationwide to faculty who teach human genetics to determine the content currently being taught. Another form of the questionnaire was sent to a population of genetic counselors to determine the needs of the lay population concerning human genetics **content**. Additional data were **collected** from faculty of human genetics **courses** at Ball State University.

Result and Conclusions. The content of a typical human genetics **course** was determined from data **obtained** from the faculty questionnaire. The **content** needed in a human genetics **course** to produce a genetically literate lay population was determined from the data obtained from genetic counselors. The data obtained from the two populations were analyzed. Significant differences between the populations in recommended content for a human genetics **course** were found. These differences included variations in: time allotments devoted to specific topics, inclusions of specific human genetics diseases/defects, and the **teaching** approach (i. e., faculty use various human genetics diseases/defects to emphasize the mode of transmission whereas genetic counselors stress the clinical aspects).

Using the **combined** data **obtained** from both populations, the **content** of a model human genetics **course** was profiled. Topics included in the **course**, time allotments (mean of means), genetic diseases/defects, and the teaching approach were determined.

Recommendations. Faculty developing a human genetics **course** could use the model human genetics profile as a guide. However, the content in a human genetics **course** should be adapted to the students' needs.

An additional study to determine the factors which genetic counselors consider when determining the importance of a genetic disease/defect, would be helpful.

Since the knowledge base in human genetics is rapidly increasing, this study should be repeated every two or three years to maintain validity of the model profile.

"Delphi Group's new Active Content Collection offers much more than simply a

**web -based e - learning** library," explains Nancy Tubb, Delphi Group analyst and program manager.

Unlike tradition forms of streaming media, the Active **Content Collection** is breaking new ground by enabling e-learners to navigate **video** over the web by detailed topics. This is accomplished through the innovative use of non...

...topic basis when they need it, rather than sequentially as they would if viewing a **video** or sequenced slide presentation.

Nancy Tubb elaborates, "The **content** in this **collection** is a combination of digital **video** married with synchronized slides, and streamed to the subscriber's desktop. The benefit of this innovative approach is that the **content** is **packaged** for quick consumption by busy executives -- each presentation is outlined to enable quick jumps from...

...that they can be immediately put into action. Based on our experience with The **Active Content Collection**, I believe non-linear **video** will become an industry standard for effective just-in-time **e - learning**."

Building the X-Economy, a five hour **multimedia** presentation, is the first feature of the **Active Content Collection**. CEOs and founders of benchmark B2B plays share their insight and experience in this pioneering...

...and IT planners a solid roadmap to the future."

#### Introductory Offer

Preview the power of **e - learning** with the Active Content Collection at <http://www.activecontentcollection.com> This site enables interested buyers ...

...information. RealPlayer 8 (<http://www.real.com>) is needed to view the demos.

Purchase this **e - learning** experience at the limited introductory price of \$599 prior to November 27, 2000 and get...

They want to **build** effective, interactive **Web courses** and **course supplements** to help their students learn more effectively and to streamline time-consuming grading and...

...a complete, anytime-anywhere solution. The academic.com suite of building blocks for developing fully **Web**-enabled **courses** is currently under development at Academic Systems Corporation and will debut this fall. Pilots will become available this spring and summer

for  
the all-in-one platform for higher-education **course** creation, **editing**  
and  
customization. Academic Systems will use the Blackboard CourseInfo teaching  
and learning environment to make the academic.com suite available over the  
**Internet** .

"Creating **online courses** can be very time-consuming and difficult for  
faculty, and they are looking for tools...

...has four key components: (1) ActiveContent(TM)  
-- a library of learning modules that provide interactive, **multimedia**  
**content** ; (2) ActiveContent **Course** Builder -- a **collection** of  
third-generation, easy-to-use, **course** -building tools; (3) a platform with  
basic **Web course** components; and (4) professional training and  
technical  
support services to help faculty put their own...

...with the existing information systems  
infrastructure at the institution.

#### ActiveContent

Faculty tell us that a **Web course** platform alone does not provide them  
with  
access to the rich multimedia instructional content they...

...used to supplement instruction in a wide variety of  
courses. For example, by developing a **Web course** or supplement on  
academic.com, that same economics professor could offer ActiveContent  
learning modules that...

...able to choose from a large collection of ready-made  
ActiveContent to include in their **web -enabled classes** or **distance**  
**learning**  
**courses** .

#### ActiveContent Course Builder

This third-generation tool kit for building rich interactive content is an

...Global Knowledge is able to offer customized Cisco content across multiple delivery methods, including Classroom **Learning**, **Virtual Classroom e - Learning** and Self Paced

**e - Learning**. This agreement further extends Global Knowledge's ability to offer its award-winning Blended Learning...

...partnership allows us to significantly enhance their corporate-wide training programs by providing the precise **content** for that each **individual** learner needs regardless of location, language or skill **level**.

Global Knowledge is among a small number of companies that have received this designation to...

...quality content as well as its delivery systems that rely on state-of-the-art

**e - Learning** technologies.

In 2001, Global Knowledge provided more than three million hours of Cisco authorized training to IT professional across the world. This agreement will extend that commitment to new **e - Learning** and **virtual** classroom environments.

"Global Knowledge was a natural candidate for this program because of their outstanding curriculum development capabilities and innovative **e - learning** offerings," says Tom Kelly, vice president, Cisco **Internet Learning**

Solutions Group. "We look forward to continuing our relationship with Global Knowledge to satisfy the...

...Enterasys and Compaq. Additionally, the company's software products division offers an extensive portfolio of **e - Learning** performance

support and training development tools, including OnDemand Personal Navigator(TM) for PeopleSoft, SAP, Siebel Systems, Microsoft, and Lotus; and

Knowledge Pathways(TM), a dynamic **online learning** platform for easy course

development, simplified training management and faster user proficiency.

Global Knowledge has...
